***iMDsoft* and ErgoGroup Join Forces in Norway and Sweden**

Oslo, Norway, and Leiden, The Netherlands – February 14, 2008 – *iMDsoft*, a leading provider of software solutions for acute care environments, and ErgoGroup, a leading Nordic information technology services company, today announced a joint distribution agreement. This partnership expands *iMDsoft*'s presence in Scandinavia and support for the MetaVision Suite of clinical information systems through ErgoGroup's operations, consulting services, and network of local offices in Norway and Sweden.

MetaVision automates local and remote ICUs and perioperative environments, and is installed at over 100 hospitals and health systems worldwide. ErgoGroup has 3,500 employees providing services from 90 locations in the Nordic region.

"*iMDsoft* delivers state-of-the-art documentation, reporting, and analysis tools that can be used at the point of care or from remote locations," said Jan Larsson, CEO of SYSteam Health and Care, a company owned by ErgoGroup. "We're excited to add MetaVision to our critical care product portfolio and offer this proven solution to both Swedish and Norwegian hospitals."

"ErgoGroup's experience in the healthcare sector and their dedication to providing innovative products and services makes them a great partner for *iMDsoft*," said Phyllis Gotlib, CEO of *iMDsoft*. "Together, we offer clinicians, IT, and hospital administrators solutions that improve care quality and information access as well as reduce costs through better decision making and operational excellence."

Three hospitals in Norway are currently using *iMDsoft*'s MetaVision Suite of fully-integrated tools for data collection, presentation, order management, clinical analysis, and decision support across the critical care and perioperative continuum.

About ErgoGroup

ErgoGroup AS, a Nordic IT company with 3500 employees and revenue of 5.5 billion NOK in 2007, offers operations, solutions, and consulting services through 90 locations in Scandinavia. The company combines sound business practices, technical expertise, and thorough knowledge of each individual customer to develop, supply, and operate comprehensive information and communication technology solutions. SYSteam, the healthcare group, offers in-depth knowledge and extensive experience in clinical IT solutions. To learn more about ErgoGroup AS, visit www.ergogroup.no.
