**St. Elisabeth Hospital Tilburg has chosen to partner with *iMDsoft* to deploy MetaVision in its critical care and perioperative continuum
*Hospital cites MetaVision's adaptability and successful record in The Netherlands as key factors in its decision***

Leiden, The Netherlands – December 8, 2008 – *iMDsoft* announced another deal in The Netherlands: St. Elisabeth Hospital Tilburg joins other Dutch hospitals by opting for MetaVision as its clinical information system of choice. *iMDsoft* and ITéMedical cooperated to provide the solution.

iMDsoft's application will be installed within a range of the hospital's ICUs, ORs, holding, and recovery rooms, enabling St. Elisabeth to create a single-platform continuum of information throughout its entire acute care environment.

"MetaVision is a proven, reliable, quality solution for intensive care units and operating rooms. It is very user friendly, which means we can concentrate our full attention on the patient," noted anesthetist Robbert Bremer. "It also helps us with data analysis to maximize the quality of care we offer our patients." Peter Bijlstra, medical manager at St. Elisabeth, referred to the system's adaptability: "MetaVision is configurable by the user, which means we don't have to fit to the system, the system will fit to us."

MetaVision clinical information systems feature tools for data collection and presentation, decision support and analysis, and order management across the critical care and perioperative continuum. They improve care quality, promote patient safety, enhance financial performance, support research and compliance, and help achieve sustainable market leadership.

"I am sure that St. Elisabeth will benefit from valuable information exchange with the long and growing list of Dutch members of the MetaVision community," said Phyllis Gotlib, CEO and co-founder of *iMDsoft*. "For nearly a decade, medical centers in the Netherlands have been using MetaVision to provide much improved care for their patients. The experience these hospitals have gained over the years constitutes a rich knowledge resource for new sites in Europe and the rest of the world."

About Elisabeth Hospital Tilburg

St. Elisabeth Ziekenhuis (Saint Elisabeth Hospital) is a 580-bed hospital general teaching hospital and center of clinical excellence. Located at a single site in the industrial city of Tilburg, it is a member of the select association of tertiary medical teaching hospitals. With a staff of almost 3,200 employees (including 145 medical specialists) and an operating budget of some €182,000,000, St. Elisabeth is the regional center for areas such as neurosurgery, traumatology, AIDS, in-vitro fertilization (IVF), dialysis, plastic surgery, dentistry, and more. For more information, visit www.elisabeth.nl.

About *iMDsoft*

iMDsoft is a leading provider of Clinical Information Systems (CIS) for critical care and the perioperative environment. The company's flagship family of solutions, the MetaVision Suite, was first implemented in 1999. It has since become a market leader, with implementations in a wide range of ICUs and ORs in North America, Europe, and Asia. For more information, visit www.imd-soft.com.

About ItéMedical

ItéMedical BV is a leading provider of specialized clinical software applications for the critical care departments of Dutch hospitals. Over 90 percent of ICUs in The Netherlands use the company's product MediScore. ItéMedical also promotes, implements and supports MetaVision countrywide. See www.itemedical.nl for further details.
