**Partners HealthCare Selects iMDsoft's MetaVision as its Acute Care and Perioperative Clinical Information Platform for Brigham & Women's and Massachusetts General Hospital**

**Boston, MA – January 22, 2009** – Partners HealthCare, founded by Brigham and Women's Hospital (BWH) and Massachusetts General Hospital (MGH), has licensed **iMDsoft's MetaVision®** as its acute care and perioperative clinical information platform for BWH and MGH. Both hospitals are ranked among the top 10 hospitals nationwide by *U.S. News & World Report*.

Partners will deploy **iMDsoft's MetaVision** at both BWH and MGH, in all critical care and general care in-patient beds. The system will also be used to document all pre-op, OR, and PACU activities of MGH, BWH, and their respective ambulatory surgery centers. This project will build on the current deployment of MetaVision as MGH's Anesthesia Information Management system. Any of the other Partners HealthCare hospitals, should they choose to do so, can purchase MetaVision licenses as part of this agreement.

"MetaVision's state of the art technology, which combines comprehensive clinical workflow management with unique decision support capabilities, has already improved care quality, efficiency, research, and education in MGH's ORs. We expect like benefits as we deploy MetaVision more broadly across the BWH and MGH," stated Cindy Spurr, MBA, RN-BC, FHIMSS, Partners Corporate Director, Clinical Systems.

MetaVision clinical information systems are used today by leading medical centers across the globe—automating data collection, presentation, decision support, analysis, and order management activities. The system has been shown to improve patient safety, quality measures, and overall performance in diverse critical care and perioperative environments. Partners will be the first US hospital system to implement MetaVision hospital-wide, bringing these benefits to all clinicians, while allowing the information to flow with the patient across the entire care continuum.

"We are delighted to further expand our relationship of many years with Partners, and bring our shared uncompromising commitment to excellence to all the exceptional care providers at Massachusetts General, Brigham and Women's, and beyond," said Phyllis Gotlib, CEO of **iMDsoft**. "MetaVision will help all of Partners further improve both safety and outcomes, streamline administrative processes and maintain its leading-edge research, all while enhancing its teaching and philanthropic agendas," Gotlib added.

### **About Partners HealthCare**

Partners HealthCare is an integrated health system founded by Brigham and Women's Hospital and Massachusetts General Hospital. In addition to its two academic medical centers, the Partners system includes community and specialty hospitals, community health centers, a physician network, home health and long-term care services and other health-related entities. Partners is one of the leading biomedical research organizations and a principal teaching affiliate of Harvard Medical School. Partners HealthCare is a non-profit organization.

### **About *iMDsoft***

*iMDsoft* is a leading provider of Clinical Information Systems (CIS) for critical care and the perioperative environment. The company's flagship family of solutions, the MetaVision Suite, was first implemented in 1999. It has since become a market leader, with implementations in a wide range of ICUs and ORs. Major medical centers across the US, Europe, and Asia use *iMDsoft* technology to improve care quality, promote patient safety, enhance financial performance, support research and compliance, and achieve sustainable market leadership.
