***iMDsoft* and Conasa sign cooperation agreement for Spain**

Leading IT services provider to distribute MetaVision clinical information systems

Leiden, The Netherlands - March 30, 2010 - Conasa, one of Spain's most established IT service providers, will distribute the full MetaVision suite of solutions from iMDsoft. iMDsoft is a global leader in hospital-wide clinical information systems, with established market-leading solutions for critical care and with customers in 21 countries across the globe.

Conasa boasts nearly three decades of experience, over a thousand employees, and offices throughout Spain. It now further enhances its range of offerings with iMDsoft's best-of-breed clinical information systems for the perioperative, critical, and acute care continuum.

The MetaVision Suite from iMDsoft includes fully-integrated tools for data collection, presentation, order management, reporting and analysis across the continuum of care. It promotes patient safety and enhances quality initiatives, cost containment, revenue capture, research, and compliance. Its distributed database capability allows for regional standardization and local flexibility.

“We welcome this opportunity to grow iMDsoft's presence in Spain and to make MetaVision - with its wide-ranging clinical, financial, and operational benefits - available to Conasa's customers,” said Phyllis Gotlib, CEO, iMDsoft. “Conasa's track record of offering innovative and effective IT services makes them a natural partner for us in the region.”

“We are very excited about this collaborative relationship with a company having the reputation of iMDsoft,” said Miguel Angel Latasa, CEO of Conasa. “Conasa’s strength as a system integrator provides rapid and complete integration with legacy, documentation, and clinical information systems. Working with iMDsoft will allow our customers to benefit from a comprehensive perioperative and critical care management solution. Conasa and iMDsoft's tested methodologies guarantee a compact cycle from planning to go-live, providing a cost-effective implementation and a proven solution to the issue of time-constraints associated with the perioperative continuum.”

About iMDsoft

iMDsoft is a leading provider of Clinical Information Systems (CIS) for preoperative, critical and general care. The company's flagship family of solutions, the MetaVision Suite, was first implemented in 1999. It has since become a market leader, with implementations in a wide range of ICUs, ORs, and, recently, general wards. Major medical centers across the US, Europe, and Asia, including 4 of the top 10 hospitals in the US and 13 of the top 50 hospitals in Europe, use iMDsoft's technology to improve care quality, promote patient safety, enhance financial performance, support research and compliance, and achieve sustainable market leadership.
